

STAG Update

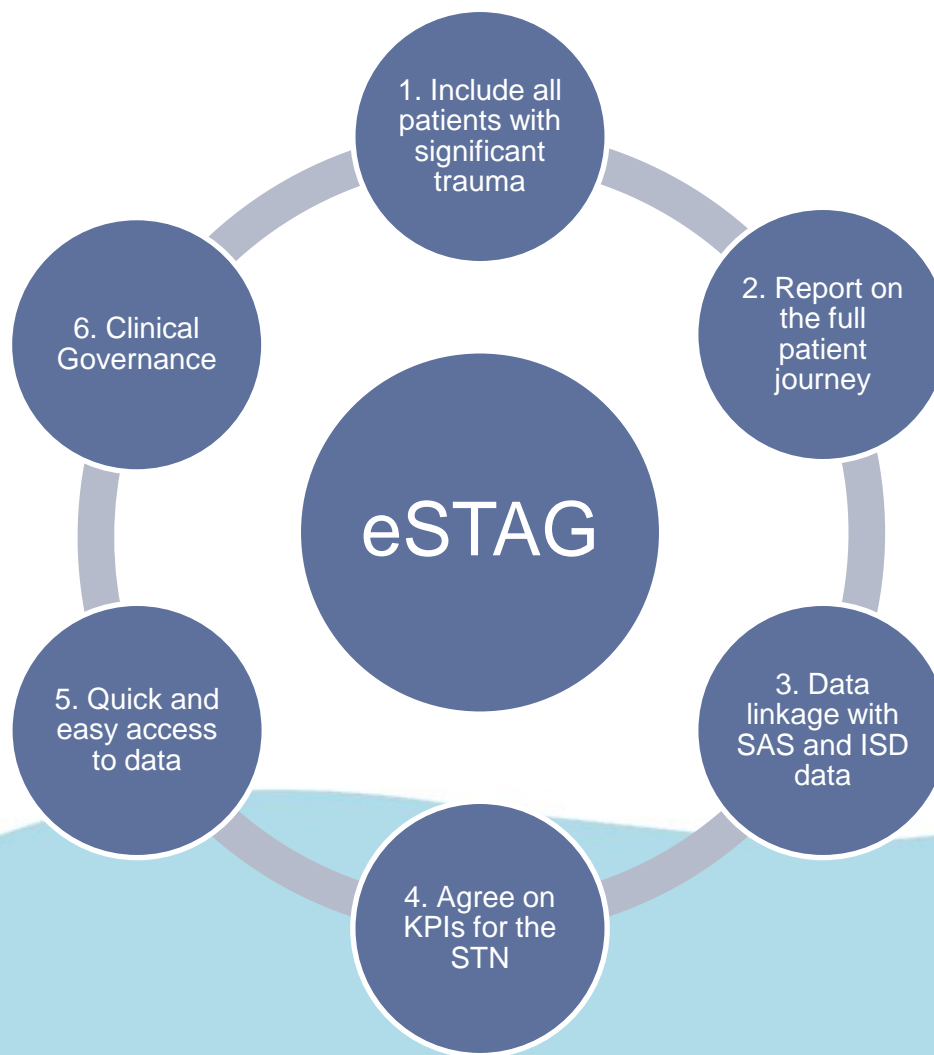

11th November 2016

Angela Khan
STAG Clinical Coordinator

A large, light blue wavy graphic that curves across the bottom of the slide, starting from the left and ending on the right.

Priorities

1. Monitor key processes due to be implemented as part of the new Scottish Trauma Network and support its ongoing development
2. Make improvements to STAG to ensure it is supporting local clinical teams to improve the care and outcomes for patients with significant trauma

eSTAG

Each electronic patient record will include:

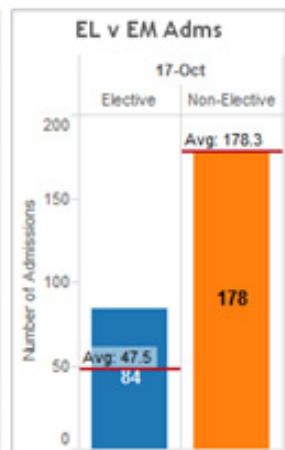

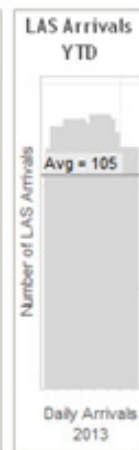

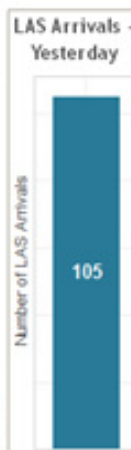

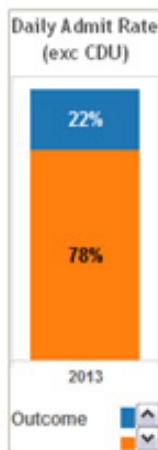

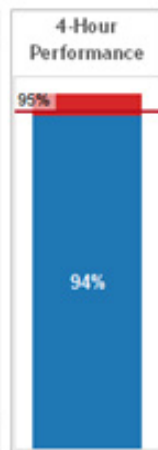

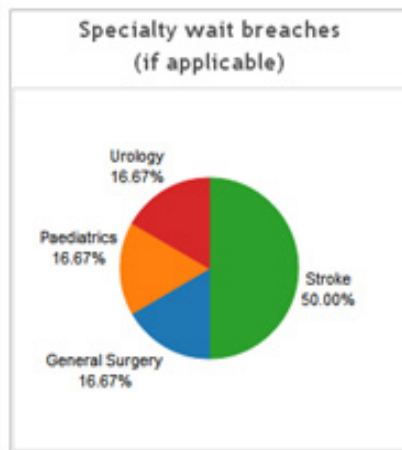

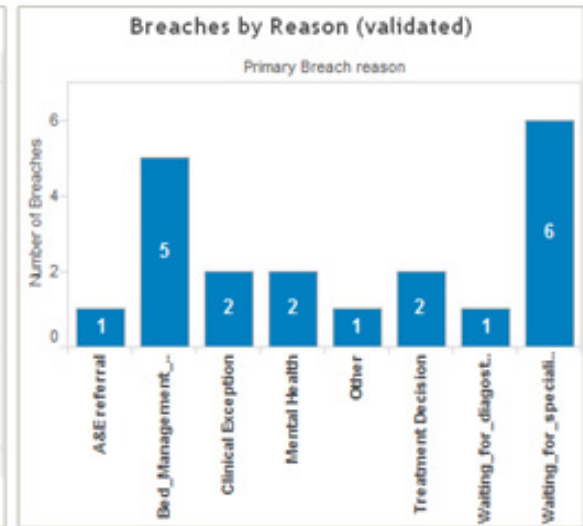

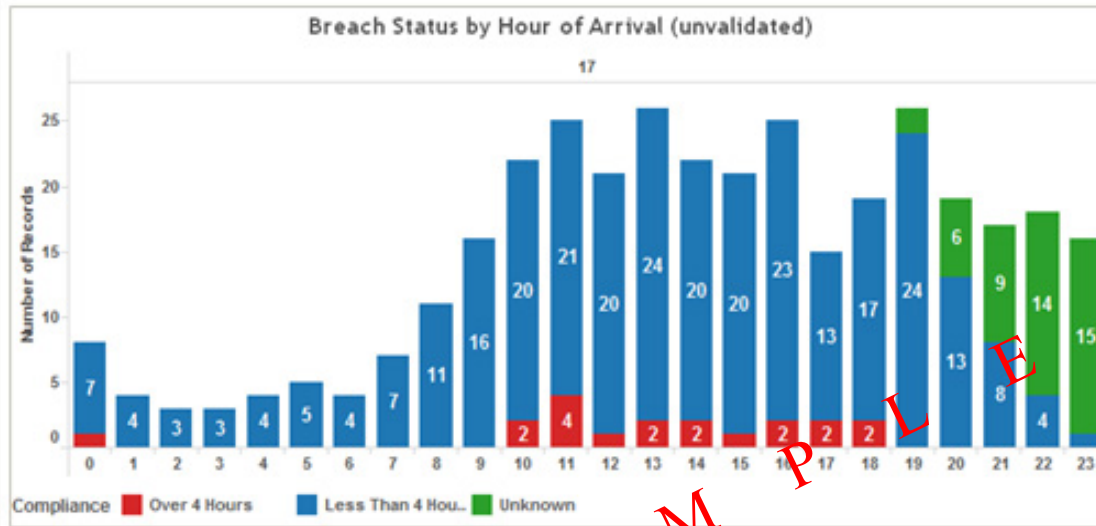

- Full patient journey (up to 30 days), which may include multiple hospitals
- Compliance with KPIs (as soon as relevant data are entered and validated)
- *Time to.....* information to eliminate searching and calculating eg *Time to head CT = 67 minutes*

Reports (via Tableau)

- Activity data for any period at any time
- KPI *unmet* reports
- KPI *met* reports at Network, HB, hospital and Division (SAS) level
- Adhoc reporting will follow in phase 2

Tableau

ED Dashboard - Daily

Recommendations following the Audit of STAG

- There are improvements that can be made to the **governance function** ✓
- Publish the **project plan**, roles and responsibilities... This year
- Increase participation to include **all hospitals** ✓
- Work collaboratively with Health Improvement Scotland to understand what **improvement methodologies the audit should offer**...training session Feb 17
- Assess the viability of increasing the formality of **reliability of data** ✓

Thank you
